

About Us

We farmed on our own account for 28 years which we enjoyed as we developed the farm with shelter belts and irrigation. I have always had an interest in farm machinery and even in farming days bought and sold a small amount of machinery.

While still farming I felt that there was a need for someone else to buy good second-hand machinery. We have now been in business on our own account for six years and filling that need we saw some years ago. Coming into the business with a farming background is very different from coming out of Sales Seminars.

In partnership with my wife who looks after the accounts, etc. we offer a personal service in the buying and selling of machinery and selling on-behalf of.

We sell machinery all over New Zealand through our Web Site and word of mouth from satisfied clients
